Working With Public Service Solar

Public Service Solar's process is simple and pressure free.

There's no high pressure sales tactics here. Starting with a free estimate, we work together to ensure your solar energy system is properly designed for your home to maximize energy production and save you money for years to come.

01 | We Educate

02 | We Survey And Confirm

03 | We Plan

04 | We Install

05 | We Support

The Public Service Solar Difference

Premium Products. Smart Financing. Installed Right.

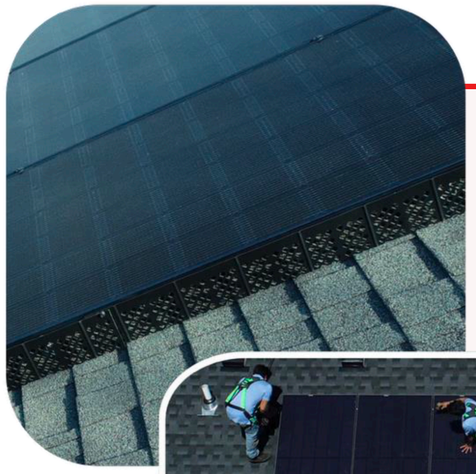
Everything we install is designed to last.
We deliver a solar system that's built for decades of reliable performance.

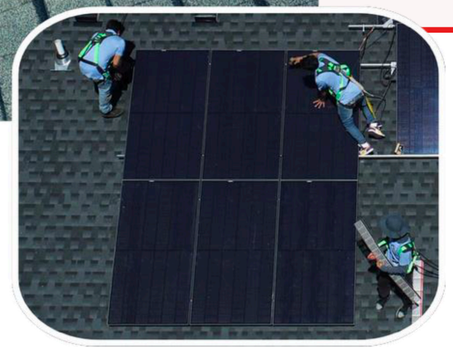
- REC solar panels
- Enphase microinverters
- In-house installation

Energy Service Agreement → Ownership
Your path to smart solar ownership.

Own your system after the initial term with **$0 upfront**, while enjoying a lower installation cost and **SREC incentives.**

You Own The System After Year 5 – No Strings Attached!





Wire guards always included.

REC 25 YEAR ProTrust WARRANTY (PRODUCT · PERFORMANCE · LABOR) | REC CERTIFIED SOLAR PROFESSIONAL | Enphase Platinum Installer | 2025 TOP SOLAR CONTRACTORS — CELEBRATING U.S. SOLAR INSTALLERS | GAF MASTER ELITE RESIDENTIAL ROOFING CONTRACTOR | GAF GOLDEN PLEDGE LIMITED WARRANTY

Local. Experienced. Trusted. | **Serving New Jersey, Pennsylvania, and Florida since 2018** | **100% In-house team**

Solar Incentives

The Double Play of Going Solar

Between energy certificates, and net metering, Public Service Solar will guide you on how to take advantage of these incentives and make your solar investment cash flow positive with long term savings. Our financing options ensure that all home solar incentives always stay with you– the homeowner. We even set up your SREC account for you, complimentary.

SRECs

Also known as Solar Renewable Energy Certificates, SRECs are redeemable cash credits issued each time a solar array produces 1,000 kWh (1 MWh) of solar electricity. This is different from getting paid for the power you don't use, but an extra credit designed to promote the adoption of renewable energy.

Net Metering

A billing mechanism which allows a solar producer to pay the "net" of their energy usage each month (ie the difference between what was put into the grid and what was pulled from the grid). This function affords the ability to be connected to both grid power and your own solar array and is what results in a reduced electric bill with solar.

The PREPAID Energy Service Agreement (ESA) COMPANY is the purchaser and owner of a solar photovoltaic system, they may be eligible for various federal commercial tax credits, or incentives for your home that you are not eligible to acquire. If you have any questions regarding your eligibility, timing, or the amount of such Incentives, please consult your personal tax accountant and/or attorney. Public Service Solar, LLC does not make any representation, warranty, or guarantee regarding the availability or amount of these Incentives. Public Service Solar is not the Prepaid ESA company and is just the licensed Installation company, at no point does Public Service Solar have any control over the ESA company or its agreements or actions throughout the ESA term.

The Public Service Solar Difference

Ultimate technology. Unparalleled service. Unrivaled warranty.

Platinum Promise Lifetime Warranty

Public Service Solar proudly backs every installation with our **Platinum Promise — a Lifetime Warranty covering workmanship and roof penetrations.** If a manufacturer's component fails under its warranty, we'll take care of it at no cost to you. **We stand by our work for life.**

About Us

Since 2018, Public Service Solar has been a trusted leader in premium solar, battery storage, EV charging, and roofing installations. As a Solar Power World Top Solar Contractor, Enphase Platinum Installer, REC Certified Solar Professional, Tesla Powerwall Certified Installer, FranklinWH Certified Installer, and GAF Master Elite Roofer, we are committed to delivering excellence from start to finish. Our dedicated in-house team manages every aspect of your project—from design through installation—with a focus on quality, aesthetics, and craftsmanship. Backed by industry-leading manufacturer warranties and our Platinum Promise Lifetime Workmanship Warranty, you can invest with confidence and enjoy decades of clean energy.

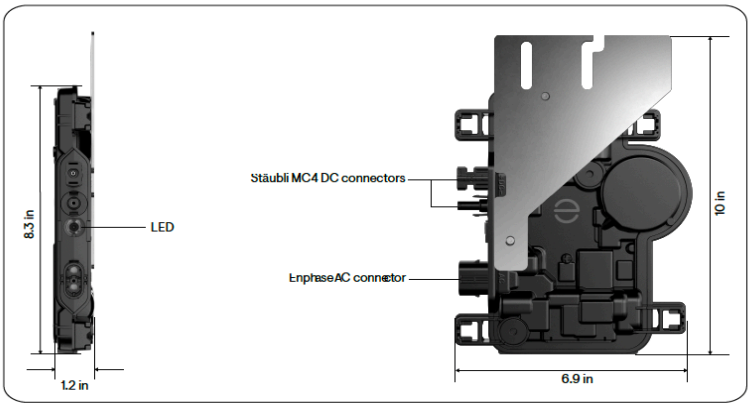
IQ8X & IQ8HC Microinverters

Enphase 25 year limited warranty

UL CERTIFIED

Key specifications	IQ8X-80-M-US/ IQ8X-80-M-DOM-US @ 240 V	IQ8HC-72-M-US@240 VAC IQ8HC-72-M-DOM-US @240 VAC
Peak output power	384 VA	384 VA
Nominal grid voltage (L-L)	240 V, split-phase (L-L), 180°	240 V, split-phase (L-L), 180°
Nominal frequency	60 Hz	60 Hz
CEC weighted efficiency	96.5%	97.0%
Maximum input DC voltage	79.5 V	60 V
MPPT voltage range	43–60 V	29.5–45 V
Maximum module I_{sc}	13 A	20 A
Ambient temperature range	–40°C to 65°C (–40°F to 149°F)	



[1] IQ8 Series Microinverters can be added to existing IQ7 systems on the same IQ Gateway only in the following grid-tied configurations: Solar Only or Solar + Battery (IQ Battery 3T/10T and IQ Battery 5P) without backup.
[2] IQ7 Series Microinverters cannot be added to a site with existing IQ8 Series Microinverters on the same gateway. Mixed system of IQ7 and IQ8 will not support IQ8-specific PCS features and grid-forming capabilities.
[3] IQ Microinverters ship with default settings that meet North America's IEEE 1547 interconnection standard requirements. Region-specific adjustments may be requested by an Authority Having Jurisdiction (AHJ) or utility representative, according to the IEEE 1547 interconnection standard. An IQ Gateway is required to make these changes during installation.
[4] Meets UL 1741 only when installed with IQ System Controller 2 or 3.

Simple

- Lightweight and compact with plug-and-play connectors
- Power line communication (PLC) between components
- Faster installation with simple two-wire cabling

Reliable

- Produces power even when the grid is down[4]
- More than one million cumulative hours of testing
- Industry-leading limited warranty of up to 25 years
- Class II double-insulated enclosure
- Optimized for the latest high-powered PV modules

Microgrid-forming

- Complies with the latest advanced grid support
- Remote automatic updates for the latest grid requirements
- Configurable to support a wide range of grid profiles
- Meets CA Rule 21 (UL 1741-SA) and IEEE 1547:2018 (UL 1741-SB 3rd Ed.)
